

What is the BEMER Device?

For people like you and me, Bemer, is a device that dramatically improves your blood flow. Now, imagine what it could do for someone who's blood flow is sick, and tired, and looks like a rush hour traffic jam?

Q. Why is that important?

A: It's important because if your blood isn't flowing in your tiny capillaries that make up 3/4s of your circulatory system, you've got serious problems... even if you aren't aware of them?

Q. What do you mean?

A: Your blood supports your body's infrastructure. Muscle tissue, bone density, and all the wiring in between. Now, if you have circulation problems (and most people do), at its worst, you'll experience some sort of breakdown... like that bridge in Portland that collapsed, because even though it had a problem, it wasn't taken care of. So, how long do you suppose the 70 trillion cells that comprise your muscles, brain and organs etc....will last if there's a problem? Do you think you'll end up feeling better, or progressively worse?

Q. Yeah, but I can always see a doctor about that. They'll prescribe me some medicine.

A: Circulatory, (cardio vascular disease) is the number one cause of death but doctor prescribed drugs and procedures are the 4th! Have you noticed what side effects people are having by taking drugs? Are you willing to risk that?

Q. Yes. If it'll make the problem go away.

A: Fair enough. Some of us are willing to risk our lives on medication, which could further complicate things, and some of us aren't. Meanwhile, do your best to keep yourself, your family and your pets healthy, because relying solely on prescriptions to fix you or them is a risky road to take. However, since there is no drug or surgery that can do what BEMER does which is increase your microcirculation by up to 30% many like to tease that BEMER is like Viagra for your whole body.

Q. What is Microcirculation?

We all think our heart, which physically is about the size of our fist, does all the work for our whole circulatory system, but it doesn't. We have a separate system called Vasomotion that causes the walls of our veins and arterioles (tiny capillaries) to rhythmically contract and pulse (profuse) your blood and all its components through your body. This is what I mean when I use the term Microcirculation. Here is where the exchange of nutrients and waste removal occurs. BEMER sends a precise patented multi-dimensional wave signal to the tiny

muscle fibers that wrap the capillary walls. Specifically this signal is carried on what is known as a pulsed electromagnetic field. This is just like the magnetic field the Earth has and that birds navigate by.

Q. How do I use the BEMER?

A: You just lie down or recline on a luxurious pad, push the start button and rest on it for 8 minutes. Can you make time to do that? You can even get a seat cushion for your desk chair or someone you know confined to a wheel chair. There are also special pads and spot devices as well as a lens cover for one of them to treat skin problems with pulsed LED red light therapy.. You can use it in a facial regime as well. I have so much more to share with you about BEMER.

Q. What happens when I push that button? Will I feel anything?

A: You really don't feel anything. We are not talking about a heating pad or vibrating chair. But this is not a placebo effect. It will improve everyone's microcirculation by up to 30%. This is an FDA registered Class one medical device that produces no harmful side effects. We like to say BEMER produces side benefits because it wakes up your own inner doctor and your body will have the 'right stuff' coming to it more efficiently so it can simply do what it does best; heal itself.

BEMER is like brushing your teeth; you have to do it twice a day to see results. It has taken many of us years to get ourselves into our present health crisis. We need to patient with BEMER and give it time to help you heal yourself. The body is amazing if it gets the right information.

A healthy capillary has 2 or 3 rhythmic contractions per minute. People who are stressed, sick and tired have only one of these capillary contractions every 10 minutes and today this is happening to people in their 20 and 30s. It's like a log jam in a river and when this happens inside your capillaries; this then cuts your cells off from their food and oxygen supply as well as waste removal.

If you own your own BEMER you can use it twice daily for as little as 8 minutes and get results that last for 12-16 hours following each session. After your body gets used to BEMER therapy, over a 6 to 8 week period you can begin adding the sleep program.

Q. How do I do that?

A: You just move the BEMER control box next to your bed and slip the body mat under a thin mattress pad. By night BEMER helps your body regenerate, detox and get rid of acidic waste.

If you would like to learn more feel free to [contact](#) me and I will be happy to set up a presentation and share how you can have a BEMER of your own. You can learn about the business opportunity that BEMER offers as well.
